

# Helyx™ User Learning

## Automated, Role-Based Training for Life Sciences

*Empowering biotech organizations with dynamic, compliance-driven training programs that automatically adapt to organizational changes, ensuring employees stay audit-ready and continuously upskilled.*

### The Business Problem We Solve

Life sciences companies struggle with training inefficiencies, compliance gaps, and disconnected learning systems. Many manual training processes fail to keep pace with frequent SOP and policy updates, increasing compliance risks. Traditional training solutions often lack integration with document control systems, leading to outdated learning content and regulatory exposure.

**Built on the Helyx Platform with the Industrial Power of Microsoft Azure**

### Key Use Cases

- 1 Automated Training Compliance:** Ensure employees stay compliant by automatically assigning training whenever controlled documents are updated.
- 2 Role-Specific Training Programs:** Deliver customized learning paths based on employee roles, reducing unnecessary training and increasing relevance.
- 3 Onboarding and Continuous Learning:** Streamline new employee onboarding with role-based training paths and provide ongoing retraining for compliance.
- 4 Audit-Ready Training Records:** Maintain full traceability of training activities, linking training completions to specific document versions for audit readiness.

### The Helyx™ Advantage

- **Built for Biotech & Pharma:** No costly customizations needed.
- **Pre-Validated & Audit-Ready:** 21 CFR Part 11, GxP, GDPR, HIPAA compliant.
- **Lower Total Cost of Ownership:** Cloud-based, automated setup, and pre-validated compliance.
- **Unified Platform:** Eliminating Silos across applications.
- **Microsoft 365 Integration:** Real-time, multi-user collaboration.
- **Rapid Deployment:** Ready in weeks, not months.
- **Scalable & Flexible:** Grows with biotechs, cost-effective without sacrificing compliance.

## Key Features

### Role-Based Learning Paths

Assign training based on job roles, ensuring employees receive only relevant content.

### Automated Training Assignments

Automatically assign training and retraining when key documents like SOPs and policies are updated.

### Progress Tracking and Certifications

Track training completion, issue certifications, and maintain compliance records.

### Integrated Document Links

Provide direct links between training materials and the latest approved versions of related documents.

### Pre-Validated Learning Modules

Built-in, GxP-compliant learning modules to support regulatory requirements.

### Customizable Learning Paths

Tailor training programs to meet specific organizational or project-based needs.

### Audit Trails and Reporting

Maintain a detailed log of training completions and certifications for inspections and audits.

## Why Helyx™ User Learning?

Helyx User Learning seamlessly integrates with document control systems, automatically adapting training programs to organizational changes while ensuring full compliance. Rapid deployment, modular pricing, and Microsoft 365 integration make it an easy-to-adopt, cost-effective solution for biotechs. Built on Microsoft Azure, it provides scalable, secure learning experiences with customizable training paths tailored to organizational needs.
